Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 6/13/05
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in —

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a);

Claims 12-19, 21, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Tondreault et al. ("Tondreault"). Per claim 1, Tondreault discloses a cable connector comprising: a) a housing 14, b) a plurality of transmitting terminals and grounding terminals 26 inserted inside said housing, c) a cable 12 having a plurality of transmitting units and grounding lines 34, each of the plurality of transmitting units having one of the plurality of grounding lines located on each of two opposing sides thereof, and d) a connecting part 18 engaging said plurality of grounding terminals with said plurality of grounding lines forming an electrical contact.

Per claim 13, said connecting part is a sheath with an electrical contact material.

Per claim 14, the connecting part includes a protrusion 44 portion located at a predetermined position.

Per claim 15, said protrusion portion is formed by a pressing process.

Per claim 16, said plurality of grounding lines are bent and connected to said connecting part.

Claims 17-19, 21, and 22 are rejected for the reasons pertaining to claims 12-16.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tondreault.

Regarding claim 20, to the extent that in Tondreault the protrusions 44 are near the distal ends of the carrier 18, at the time of the invention, it would have been obvious to move them inward along the carrier as desired (such that wing portions would be outward of the protrusions). Such a modification would have been a matter of engineering design choice, being a rearrangement of parts without patentable significance. See In re In re Japikse, 274 F.2d 669 (CCPA 1960).

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
